Position Highlights

As an intern in this division, you will be provided a city vehicle and cell phone. In addition to this, special field trips will be offered such as tours of the water treatment plant, the heavy fleet repair garages, the traffic control center, the recycling yard and a water pipe lining operation.

While working in this division some of the opportunities you will experience are:

- Assist Professional Engineers and Managers on city construction projects.
- Assist with engineering calculations, documentation, as built data, and interpretation of design plans and field inspection.
- Create design plans.
- Work with staff to respond to resident concerns.
- Work on a variety of construction and engineering assignments.

Minimum Qualifications:

- Computer skills: Proficient in Microsoft Office (Excel, Word, and PowerPoint).
- Self-motivated candidates should have the ability to work independently and in a team environment.

Location

Hiawatha Maintenance Facility (1901 26th St E). These internships are in-person.
